"MAKE HOBBY OF GARDENING"
SEMPERVIVUMS

..... DESCRIPTIVE LIST OF SEMPERVIVUMS

- ALPHA Deep red fringed with green, white hairy tips, later changing to a rosy red - grows to 3".
- GAMMA Brownish red, edged with light green, hairy tips, grows to 2".
- RUBERUM Bright red with broad leaves, later changing to a reddish brown color, grows to 4".
- ROSY PURPLE BEAUTY . . Rosy purple, long broad leaves, keeps color through season, grows to 8".
- ATROPURPUREUM Dark red, short leaves, compact rosette, very beautiful, keeps color through season.
- QUEEN AMALEA Green with purplish brown tips, slightly hairy leaves.
- SOBOLIFERUM Bluish-green globe-shape, slight red tip on small offsets.
- GLOBIFERUM Similar to Soboliferum but a yellow-green and the tips have more red; rosettes grow to 2-1/2".
- RUBRUM-BORSCH Bright red, a slight fringe of green, very colorful, rosettes grow to 3" - similar to Ruberum.
- SIEBENBERGEN Bluish-green, broad, long leaves with very small purplish red tip. Grows to 4".
- MAUVINE A mauve color with darker tipped leaves, very beautiful, slightly hairy on leaf edge.
- KINDINGERI Green velvety leaves, tips slightly colored purplish-red. Grows to 2".
- SILVERINE Very silvery green in some soils, large rosettes, base of leaf is pink.
- CALCAREUM Bluish-green rosettes with broad brown section at the tip, very choice variety - grows to 4"
- RUBICUNDUM HYERIDUM . Very beautiful, deep red, base of outer leaves a bright red, tips of outer leaves green, inner base of leaves green. Grows to 4".
- POWELII Center red, outer parts of leaves are green, very colorful, grows to 6".
- SPINOSA A form of Umbillicus, very spiny rosette, very unusual. Grows to 3".
- UMBILLICUS CHYSANTHUS Bluish-green, velvety leaves, hairy edges. 1" rosette.

..... DESCRIPTIVE LIST OF SEMPERVIVUMS

- RUBRA RAY

A hybrid, similar to Powelii coloring, green with deep red at base, red continuing out to the tip of leaves early in the spring, later green crowds the red back.
- HEUFFELII

Bluish-green, broad purplish tip, does not have offsets. Multiplies by division. Grows to 3-1/2".
- RUBRA ASH

Deep purplish-red center, leaves edged in white hairs with the outer leaves with a slight tinge of ambergreen.
- ARCHNOIDEUM

Small green rosettes, very cob-webby, offsets hug mother plant, 15 to 20 offsets.
- A. RUBRUM

Webby variety, very webby centers, green, broadly tipped in medium brownish red. Offsets on long stems.
- A. LAGGERI

1" rosettes, very cob-webby, offsets hugging mother plant, producing about 20 offsets, look like little jewels.
- A. DEZERMIT

Green cob-webby rosettes
- A. PILOSELLUM

Webby variety.
- PURDY'S SANGUINEUM . .

Very small webby, 1/2" green rosettes with reddish outer leaves.
- ARENAREUM

Tiny deep green rosette, tipped with red.
- BETTE

Green and coppery rosettes tufted with white hairs.
- BRAUNI

Large deep bronze rosettes with red tips.
- FAUCONETTI

Very green rosettes with fringed hairs.
- FIMBRIATUM

Small green and red rosettes - grow nice in clumps.
- HILLEBRANDTHII

Small with dark green leaves.
- PURDY'S 60-1

Small red rosettes.
- RUTHENICUM

Rosettes grayish green leaves.
- TRISTE

Medium sized bronzy-green rosettes.
- CANTALICUM

3" rosettes of green tipped with violet.
- LAGGERI

Green and red rosettes, densely covered with webby hairs.
- METTENIANUM

Flat rosettes, gray-green in color.
- VERLOTHII

3" emerald green, red tip.
- VIOLESCENS

Grows to 6" grayish rosettes, tinted with violet.
